

# WORKFORCE INTELLIGENCE & HR ATTRITION ANALYTICS

Executive-Level Power BI Dashboard | Fortune 500 Consulting Style Presentation

# Executive KPI Overview & Workforce Insights

| KPI              | Value  | Business Insight                                                                              |
|------------------|--------|-----------------------------------------------------------------------------------------------|
| Total Employees  | 10,000 | Represents the overall workforce analyzed across all departments and roles.                   |
| Total Attrition  | 2,247  | A significant number of employees exited the organization, indicating workforce instability.  |
| Attrition Rate   | 22.47% | The organization is experiencing elevated retention pressure compared to industry benchmarks. |
| Active Employees | 7,753  | Current workforce strength after accounting for employee exits.                               |
| Average Age      | 40     | The workforce is primarily experienced mid-career professionals.                              |

**Strategic Insight:** Attrition trends indicate operational burnout, workforce fatigue, and retention challenges in technical and high-pressure business functions.

# Attrition Risk & Workforce Stability Analysis

---

| Risk Driver        | Business Impact                               | Severity |
|--------------------|-----------------------------------------------|----------|
| Frequent Travel    | Burnout and increased resignation probability | High     |
| Excessive Overtime | Employee fatigue and engagement decline       | High     |
| Low Satisfaction   | Reduced morale and retention risk             | Critical |
| Role Pressure      | Operational stress and workforce instability  | High     |
| Compensation Gaps  | Competitive job switching behavior            | Medium   |

**Key Finding:** Technical teams and operational workforce segments demonstrate the highest attrition vulnerability due to workload intensity and market demand.

# Strategic Retention Recommendations

---

| Strategy                         | Recommendation                                                                        |
|----------------------------------|---------------------------------------------------------------------------------------|
| Role-Specific Retention          | Develop targeted retention initiatives for high-risk departments and technical roles. |
| Reduce Workforce Fatigue         | Optimize overtime exposure and improve work-life balance programs.                    |
| Predictive HR Monitoring         | Implement workforce risk scoring and proactive monitoring systems.                    |
| Employee Engagement              | Strengthen recognition, leadership support, and career development initiatives.       |
| Executive Workforce Intelligence | Enable leadership teams with real-time workforce intelligence dashboards.             |

# Transforming HR Data into Strategic Workforce Intelligence

This HR Analytics initiative demonstrates how advanced workforce intelligence can elevate HR from operational reporting into strategic business decision-making. By integrating attrition analytics, behavioral workforce indicators, and executive dashboards, organizations can proactively reduce workforce risk, improve employee retention, and strengthen long-term organizational performance. The project showcases advanced Power BI dashboarding, executive storytelling, business intelligence strategy, and real-world workforce analytics capabilities.
